## Description

---

BushPower is a company specializing in solar panels and power products in the 4x4 and outdoor leisure market or where an eco-friendly power solution is required. Whether for leisure, a house, a lodge, or even a remote transmitter site, BushPower can assist. I offer a one-stop-shop, where you will find everything needed to install your equipment. Besides solar panels and associated items, the product range also includes a full range of DC to AC inverters, DC to DC power adapters for notebooks, deep cycle and high cycle batteries, including flooded, AGM and Lithium batteries, battery chargers, fridges and freezers, power backup units and UPS's, LED lights, and of course connectors and cables. All the products have been carefully chosen, are of a high quality, and are offered at extremely competitive prices. Most items – including solar panels – can be couriered countrywide or posted for an additional fee. We always test our products ourselves before offering them to clients. We have our own Victron and SMA based Solar and Backup System at the office, plus we are regular campers who prefer to camp offgrid as much as possible, and in so doing, we have kitted out our Bushlapa Baobab in order to put all the various components to the test. On this web site you will find product information with prices and relevant details. If you need further information, or have any suggestions, please contact us.
