Description

We offer on-site assessments that includes cost of new or add-on installation for Networking, CCTV, PC's, laptops and software. We also advise you on your current system and what can be done to optimize it. We work out upgrade schedules, software license management, monthly maintenance to your specific business needs and backup solutions. Are you plagued by system downtime, viruses, spyware, losses of productivity, and every other excuse for why the system you rely upon to run your business is not working consistently and as expected? These distractions are unnecessary and very expensive. It's not just about monitoring, that just lets you know something is wrong. It's not just about remote access to your systems to troubleshoot issues. It's about a proactive best-practices approach to keeping your systems up, running and available.
